

CPR & AED - Basic Life Support

Help to Save Life

Course Overview

The difference between doing something and doing nothing could mean someone's life or death. As a fitness practitioner, we might face situations where we will need to provide primary care during emergency situations – you never know when you'll be required to perform cardiopulmonary resuscitation (CPR). This course is suitable for fitness practitioners, or anyone with limited or no medical training who need basic CPR and automated external defibrillator (AED) training to meet job regulations and requirements. All participants will be taught how to respond to life-threatening emergencies by providing primary care according to the American Heart Association (AHA) standards.

Note: Having a valid CPR & AED certificate is required by all individuals who wish to pursue any certification course offered by FITM

Course Highlights

- Easy to follow, step by step guide to performing CPR according to the AHA standards
- Learn CPR in the easiest, most fun, effective yet impactful way
- Hands on practice on CPR manikin and AED training kit
